BEST FIT

.NET build & integration

Build & release automation

Software packaging & delivery

CORE STACK

Runtime: C#, .NET, MSBuild, NuGet

Integration: Desktop add-ons, application builds

Quality: Smoke tests, dotnet-coverage

DevOps: Jenkins, PowerShell, Azure

Scripting: Python, PowerShell, Wix

STRENGTHS

.NET 10 migration & signing

Maintaining supported versions

Changes spanning related repositories

Legacy modernization

BUILD FOCUS

Packaging software dependencies

Smoke & regression tests

Authenticode signing checks

LANGUAGES

Romanian – native

English – fluent

CERTIFICATIONS

Java 1 Associate (OCA)

C# Advanced

EDUCATION

BSc Computer Science

University of Bucharest, 2019–2022

PROFILE

Build and release engineer with 4+ years working with C#/.NET services and software delivery. Experience upgrading .NET products, maintaining MSBuild and NuGet packages, automating release checks, and debugging live services.

EXPERIENCE

.NET / Build Engineer

Sep 2025 – Aug 2026

Alten · Autodesk — .NET Build & Integration

.NET · MSBuild · Jenkins · PowerShell · Azure

- Upgraded desktop add-on products to **.NET 10**, updating projects and dependencies for four supported versions.
- Traced **undocumented build dependencies** with limited version visibility; coordinated rebuilds of specialized artifacts.
- Added **smoke tests** to check basic functionality before packaging; updated build scripts with PowerShell and MSBuild.
- Restored **Authenticode signature checks** after the .NET 10 upgrade for supported software versions.
- Adapted **Jenkins pipelines for clean Azure agents**, removing reliance on artifacts pre-cached on AWS ECS workers.

.NET Developer

Sep 2022 – Jul 2025

Cognyte

C#/.NET · Jenkins · Ansible · Groovy · Wix

- Developed and supported **40+ microservices**, including 15 core services; delivered features and investigated performance issues.
- Developed **C#/.NET service features and fixes**; attached a debugger remotely to diagnose running production services.
- Automated **builds and deployments** with Jenkins, Ansible, Groovy, and Wix.

Earlier Roles

2021 – 2025

CS Vision · Independent Contractor

- Intern (CS Vision): ASP.NET MVC / WPF maintenance and Java→WPF migration.
- Contractor (2025): **ERP modernization** scripts and React automation.

PROFESSIONAL DEVELOPMENT

Software Architect Course

23 Jun – 11 Sep 2026

Skillab · *Completed 11 September 2026 · 19 lectures*

Software design · AWS · Security · Cost analysis

- Designed the **architecture for a simulated online shop**: C4 diagrams, AWS/ECS deployment, STRIDE threat analysis, and operating-cost estimates.
- **Go backend for a simulated shop**: product listing/details via REST/gRPC; Prometheus metrics and k6 load tests.

PERSONAL PROJECTS

FamilyHub Manager

Feb 2026 – Present

Personal project · System design & AI-assisted development

Django REST · React · AWS · Cloudflare · MCP · Local LLMs

- Defined **property, rent, and document workflows**; reviewed AI-generated code and tested the web interface and APIs.
- Reviewed **cloud hosting and AI connectivity**: AWS deployment, Cloudflare routing, MCP API access, and local-model integration.
- Coordinated **Grok, Cursor, and Codex agents**: assigned tasks, kept handoff notes, reviewed changes, and checked completed features.
