BEST FIT

Platform & internal tooling

Build systems & packaging

AI integrations & developer tooling

CORE STACK

Platform: Build systems, reusable pipelines

CI/CD: Jenkins, Groovy, GitHub Checks

Cloud: Azure agents, artifact storage

Scripting: PowerShell, Python, Groovy

Quality: Cobertura, dotnet-coverage

STRENGTHS

Reusable Jenkins pipelines

Reusable packaging steps

Build dependency troubleshooting

Developer tools & onboarding

PLATFORM PATTERNS

Configurable Jenkins build options

Shared Groovy libraries

Automatic integration checks

LANGUAGES

Romanian – native

English – fluent

CERTIFICATIONS

Java 1 Associate (OCA)

C# Advanced

EDUCATION

BSc Computer Science

University of Bucharest, 2019–2022

PROFILE

Platform engineer with 4+ years developing software and automating builds and deployments. Experience adapting builds for clean Azure agents, creating reusable Jenkins pipelines, and debugging production services. Exploring AI integrations through a personal Django/React project.

EXPERIENCE

Platform Engineer

Sep 2025 – Aug 2026

Alten · Autodesk — CI/CD Platform

Azure · Jenkins · Groovy · PowerShell · .NET · Artifactory

- Adapted **Jenkins pipelines for clean Azure agents**, removing reliance on artifacts pre-cached on AWS ECS workers.
- Created **reusable Jenkins pipelines** so teams could build new branches without copying pipeline code.
- Traced **undocumented build dependencies** with limited version visibility; coordinated rebuilds of specialized artifacts.
- Added **test-coverage reports** and CI checks with Cobertura.
- Triggered **application integration checks** automatically after package builds.

.NET Developer

Sep 2022 – Jul 2025

Cognyte

C#/.NET · Ansible · Jenkins · Groovy · Wix

- Developed and deployed **40+ microservices**, including 15 core services.
- Automated **builds and deployments** with Jenkins, Ansible, Groovy, and Wix.
- Diagnosed **production failures** through remote debugging of running C#/.NET services; trained colleagues.

Earlier Roles

2021 – 2025

CS Vision · Independent Contractor

- Intern (CS Vision): ASP.NET MVC / WPF maintenance and Java→WPF migration.
- Contractor (2025): **ERP modernization** scripts and React automation.

PROFESSIONAL DEVELOPMENT

Software Architect Course

23 Jun – 11 Sep 2026

Skillab · *Completed 11 September 2026 · 19 lectures*

Software design · AWS · Security · Cost analysis

- Designed the **architecture for a simulated online shop**: C4 diagrams, AWS/ECS deployment, STRIDE threat analysis, and operating-cost estimates.
- **Go backend for a simulated shop**: product listing/details via REST/gRPC; Prometheus metrics and k6 load tests.

PERSONAL PROJECTS

FamilyHub Manager

Feb 2026 – Present

Personal project · System design & AI-assisted development

Django REST · React · AWS · Cloudflare · MCP · Local LLMs

- Defined **property, rent, and document workflows**; reviewed AI-generated code and tested the web interface and APIs.
- Reviewed **cloud hosting and AI connectivity**: AWS deployment, Cloudflare routing, MCP API access, and local-model integration.
- Coordinated **Grok, Cursor, and Codex agents**: assigned tasks, kept handoff notes, reviewed changes, and checked completed features.
