BEST FIT

DevOps & release automation

Platform & build engineering

CI/CD & build troubleshooting

CORE STACK

CI/CD: Jenkins, Groovy, GitHub Checks

Cloud: Azure, PowerShell, Python

Build: .NET, MSBuild, Artifactory

Scripting: C#, Groovy, JavaScript

Config: Ansible, Docker

STRENGTHS

Build dependency troubleshooting

Digital signing & package checks

Build troubleshooting & test reports

Mentoring & onboarding

DELIVERY PRACTICES

Multibranch pipeline-as-code

Coverage reports & GitHub Checks

Release-branch automation

LANGUAGES

Romanian – native

English – fluent

CERTIFICATIONS

Java 1 Associate (OCA)

C# Advanced

EDUCATION

BSc Computer Science

University of Bucharest, 2019–2022

PROFILE

DevOps engineer with 4+ years developing software and automating builds and deployments. Experience adapting Jenkins pipelines for clean Azure agents, maintaining .NET releases, and diagnosing production failures. Uses PowerShell, Python, Groovy, and Ansible to reduce manual release work.

EXPERIENCE

DevOps Engineer

Sep 2025 – Aug 2026

Alten · Autodesk — Build & Release Platform

Azure · Jenkins · Groovy · PowerShell · .NET · Artifactory

- Adapted **Jenkins pipelines for clean Azure agents**, removing reliance on artifacts pre-cached on AWS ECS workers.
- Created **reusable Jenkins pipelines** with shared Groovy code, build options, and automatic version numbering.
- Fixed **digital-signature checks** after the .NET 10 upgrade; stopped packaging when signature verification failed.
- Added **GitHub Checks** for build/test results and Cobertura coverage reports.
- Traced **undocumented build dependencies** with limited version visibility; coordinated rebuilds of specialized artifacts.

.NET Developer

Sep 2022 – Jul 2025

Cognyte

C#/.NET · Ansible · Jenkins · Groovy · Bitbucket · Wix

- Developed and supported **40+ microservices**, including 15 core services, from feature changes to production support.
- Automated **builds and deployments** with Jenkins, Ansible, Groovy, and Wix.
- Diagnosed **production and pipeline failures**, including remote debugging of running C#/.NET services; trained colleagues.

Earlier Roles

2021 – 2025

CS Vision · Independent Contractor

- Intern (CS Vision): ASP.NET MVC / WPF maintenance and Java→WPF migration.
- Contractor (2025): **ERP modernization** scripts and React automation.

PROFESSIONAL DEVELOPMENT

Software Architect Course

23 Jun – 11 Sep 2026

Skillab · *Completed 11 September 2026 · 19 lectures*

Software design · AWS · Security · Cost analysis

- Wrote the final **ADR for the Cheeky Cart online-shop case study**: C4 diagrams, AWS/ECS deployment, STRIDE threat analysis, and COGS estimates.
- **Go backend for a simulated shop**: product listing/details via REST/gRPC; Prometheus metrics and k6 load tests.

PERSONAL PROJECTS

FamilyHub Manager

Feb 2026 – Present

Personal project · System design & AI-assisted development

Django REST · React · AWS · Cloudflare · MCP · Local LLMs

- Defined **property, rent, and document workflows**; reviewed AI-generated code and tested the web interface and APIs.
- Reviewed **cloud hosting and AI connectivity**: AWS deployment, Cloudflare routing, MCP API access, and local-model integration.
- Coordinated **Grok, Cursor, and Codex agents**: assigned tasks, kept handoff notes, reviewed changes, and checked completed features.
