GitHub

BEST FIT

Software engineer (generalist)

DevOps & build/release

API integration & CI/CD

CORE STACK

CI/CD: Jenkins, Azure, GitHub Checks

Languages: C#, Python, PowerShell

Build: .NET, MSBuild, Artifactory

Methods: Release automation, mentoring

STRENGTHS

Clean-agent build pipelines

Jenkins pipeline design

.NET build & release

Cross-team coordination

DELIVERY FOCUS

Multibranch pipeline-as-code

Digital signing & package checks

Coverage & GitHub Checks

LANGUAGES

Romanian – native

English – fluent

CERTIFICATIONS

Java 1 Associate (OCA)

C# Advanced

EDUCATION

BSc Computer Science

University of Bucharest, 2019–2022

PROFILE

Software engineer with 4+ years developing .NET services, automating releases, and troubleshooting production issues. Experience with Jenkins, Azure, MSBuild, and Ansible; personal projects focus on API integrations and AI-assisted development.

EXPERIENCE

DevOps Engineer

Sep 2025 – Aug 2026

Alten · Autodesk — Build & Release

C# · .NET · Jenkins · Azure · PowerShell

- Adapted **Jenkins pipelines for clean Azure agents**, removing reliance on artifacts pre-cached on AWS ECS workers.
- Traced **undocumented build dependencies** with limited version visibility; coordinated rebuilds of specialized artifacts.
- Created **reusable Jenkins pipelines** with shared Groovy code, build options, and automatic version numbering.
- Maintained **.NET builds and releases**: MSBuild packages, NuGet publishing, Artifactory storage, and digital-signature checks.
- Investigated **build failures**, added coverage reports and GitHub Checks, and coordinated releases with other teams.

.NET Developer

Sep 2022 – Jul 2025

Cognyte

C#/.NET · Jenkins · Ansible · Python

- Developed and supported **40+ microservices**, including 15 core services.
- Automated **builds and deployments** with Jenkins, Ansible, and Groovy.
- Diagnosed **application and deployment failures**, including remote debugging of running C#/.NET services.

Earlier Roles

2021 – 2025

CS Vision · Independent Contractor

- Intern (CS Vision): ASP.NET MVC / WPF maintenance and Java→WPF migration.
- Contractor (2025): **ERP modernization** scripts and React automation.

PROFESSIONAL DEVELOPMENT

Software Architect Course

23 Jun – 11 Sep 2026

Skillab · *Completed 11 September 2026 · 19 lectures*

Software design · AWS · Security · Cost analysis

- Wrote the final **ADR for the Cheeky Cart online-shop case study**: C4 diagrams, AWS/ECS deployment, STRIDE threat analysis, and COGS estimates.
- **Go backend for a simulated shop**: product listing/details via REST/gRPC; Prometheus metrics and k6 load tests.

PERSONAL PROJECTS

FamilyHub Manager

Feb 2026 – Present

Personal project · System design & AI-assisted development

Django REST · React · AWS · Cloudflare · MCP · Local LLMs

- Defined **property, rent, and document workflows**; reviewed AI-generated code and tested the web interface and APIs.
- Reviewed **cloud hosting and AI connectivity**: AWS deployment, Cloudflare routing, MCP API access, and local-model integration.
- Coordinated **Grok, Cursor, and Codex agents**: assigned tasks, kept handoff notes, reviewed changes, and checked completed features.
