

Florentin-Cristian Fusneica

.NET ENGINEER · BUILD & RELEASE AUTOMATION

CONTACT

-  Bucharest, Romania
-  +40 771 434 701
-  fusneica.florentin.cristian@gmail.com
-  LinkedIn
-  GitHub

BEST FIT

- .NET build & integration
- Build & release automation
- Software packaging & delivery

CORE STACK

- Runtime:** C#, .NET, MSBuild, NuGet
- Integration:** Desktop add-ons, application builds
- Quality:** Smoke tests, dotnet-coverage
- DevOps:** Jenkins, PowerShell, Azure
- Scripting:** Python, PowerShell, Wix

STRENGTHS

- .NET 10 migration & signing
- Maintaining supported versions
- Changes spanning related repositories
- Legacy modernization

BUILD FOCUS

- Packaging software dependencies
- Smoke & regression tests
- Authenticode signing checks

LANGUAGES

- Romanian** – native
- English** – fluent

CERTIFICATIONS

- Java 1 Associate (OCA)
- C# Advanced

EDUCATION

- BSc Computer Science**
- University of Bucharest, 2019–2022

PROFILE

Build and release engineer with 4+ years working with C#.NET services and software delivery. Experience upgrading .NET products, maintaining MSBuild and NuGet packages, automating release checks, and debugging live services.

EXPERIENCE

- .NET / Build Engineer** Sep 2025 – Aug 2026
Alten · Autodesk — .NET Build & Integration
 - Upgraded desktop add-on products to **.NET 10**, updating projects and dependencies for four supported versions.
 - Updated **MSBuild packages and runtime dependencies** across four or more related code repositories.
 - Added **smoke tests** to check basic functionality before packaging; updated build scripts with PowerShell and MSBuild.
 - Restored **Authenticode signature checks** after the .NET 10 upgrade for supported software versions.
 - Split **package preparation** into reusable steps that cache downloads and discover NuGet dependencies.

- .NET Developer** Sep 2022 – Jul 2025
Cognyte
 - Developed and supported **40+ microservices**, including 15 core services; delivered features and investigated performance issues.
 - Developed **C#.NET service features and fixes**; attached a debugger remotely to diagnose running production services.
 - Automated **builds and deployments** with Jenkins, Ansible, Groovy, and Wix.

- Earlier Roles** 2021 – 2025
CS Vision · Independent Contractor
 - Intern (CS Vision): ASP.NET MVC / WPF maintenance and Java → WPF migration.
 - Contractor (2025): **ERP modernization** scripts and React automation.

PROFESSIONAL DEVELOPMENT

- Software Architect Course** 23 Jun – 11 Sep 2026
Skillab · Completed 11 September 2026 · 19 lectures
 - Designed the **architecture for a simulated online shop**: C4 diagrams, AWS/ECS deployment, STRIDE threat analysis, and operating-cost estimates.
 - Product API in Go**: REST/gRPC APIs, Prometheus metrics, and k6 load tests.

PERSONAL PROJECTS

- FamilyHub Manager** Feb 2026 – Present
Personal project · System design & AI-assisted development
 - Defined **property, rent, and document workflows**; reviewed AI-generated code and tested the web interface and APIs.
 - Reviewed **cloud hosting and AI connectivity**: AWS deployment, Cloudflare routing, MCP API access, and local-model integration.
 - Coordinated **Grok, Cursor, and Codex agents**: assigned tasks, kept handoff notes, reviewed changes, and checked completed features.
